

An Introduction to Numicon

Numicon is a proven maths approach for ALL students. The visual & kinaesthetic approach is very appealing to all students including students with special/high learning needs

- **Visual, practical base** to develop conceptual understanding
- **Problem-solving** using real-life contexts that give every activity a purpose
- **Reasoning mathematically** by seeing relationships and making generalizations
- **Collaborative Approach** – to explain, justify and reason and learn together
- **All strands** covered to NZC Level 4 with **cross-curricular content**
- **Proven pedagogy** raising achievement across all levels, sustained over time
- **Impressive results**

*I have been teaching maths for 30 years, but now I really love it!
Thanks to Numicon." Jane*

affiliate programme

Suitable for all teachers including SENCO's, RTLB's, Teacher Aides working with students at NZC Levels 1 – 4.

Purpose: To equip you to support all students in learning Mathematics

Covering: What Numicon is and how to use it

Provides you with a **Maths Bag** to use as a starter in your class the next day

An Introduction to Numicon – Making Maths Real

Presented by Belinda Walker

Wednesday 7th August - 9 am till 3 pm

Kimbolton School, Henderson St, Kimbolton

Bring your own lunch – morning tea provided

Register online at www.edushop.nz

\$160.00 + GST

REGISTRATIONS close 23rd July

- Practical, hands-on activities illustrating mathematics
- Exploring the theory and learning activities
- Considering factors affecting children's learning
- Implementing Numicon
- Assessment
